27th Ljudevit Jurak

International Symposium
on Comparative Pathology
with One Health Session

May 31st and June 1st, 2019, Zagreb, Croatia

University Clinical Hospital Center Sestre milosrdnice

Dear colleagues,

The Organizing Committee cordially invites you to Zagreb to take part in the

27th Ljudevit Jurak International Symposium on Comparative Pathology with One Health Session

This symposium summons international collaboration and involves an array of professionals within the field of pathology. What separates and defines this symposium is its collaboration with veterinary pathologists, and furthermore, comparison of pathologic changes in human and veterinary medicine. With this symposium we honour Professor Ljudevit Jurak, who founded the first pathology department in Croatia, in Sestre milosrdnice University Hospital Center. Professor Ljudevit Jurak contributed greatly to Veterinary and Human Pathology as well as Forensic Medicine and represents an historical and eminent figure in the field of pathology both in Croatia and worldwide (<http://jurak.mef.hr/>).

The main topic of this Symposium is **NEW APPROACHES IN IMMUNOLOGY OF TUMORS AND OTHER DISEASES**.

All pathologists dealing with Human and Veterinary Pathology as well as Forensic Pathologists are invited to participate and support this multidisciplinary meeting. We are thrilled to call upon all professionals within the field of Pathology and Forensic Medicine to attend and engage in a variety of discussions, social gathering and enjoyment.

This year, for the first time, One Health Session will be also included in the program of the Symposium. The One Health concept is a worldwide strategy for expanding interdisciplinary collaborations and communications in all aspects of health care for humans, animals and the environment (<http://www.onehealthinitiative.com/index.php>). Therefore, we are expanding our invitation at this point to all medical disciplines and other professions interested in sharing their interest in the ONE HEALTH arena at the 2nd day of the Symposium. The variety of topics presented by the international invited speakers will provide a framework for contributions of other participants.

POSTER SESSION: We also invite all interested colleagues to send their abstracts for the poster presentation regarding the main topic, as well as other surgical pathology topics.

STUDENT POSTER ONE HEALTH AWARD COMPETITION: Interprofessional student teams or individuals are again invited to present their posters in the topic of ONE HEALTH (interdisciplinary and interprofessional teams that work on research topics that include human and animal medicine, environmental health, animal models of human disease, and translational science) to compete for the 1,000 HRK "S. TKALČIĆ ONE HEALTH AWARD".

We hope that you will enjoy the scientific program as well as the social events included.

This work is supported by Scientific Center of Excellence for Reproductive and Regenerative Medicine, Republic of Croatia, and by the European Union through the European Regional Development Fund, under grant agreement No. KK.01.1.1.01.0008, project „Reproductive and Regenerative Medicine - Exploring New Platforms and Potentials“.
